Activity Priorities and Description

Program Key Priority Area *

Mental Health

Other Program Key Priority Area Description**Aim of Activity ***

To support service delivery, through: service navigation, NDIS testing support, capacity, and strengths-based assessment.

Description of Activity *

Access Enablers will be employed to provide services to improve the integration of local health services, promote multi-disciplinary care, and make the health system more accessible to people with severe mental illness and associated psychosocial disorders. They will provide advice and referral assistance to consumers, their families and carers.

The activity will reduce the avoidable need for more intense and acute health services and enhance appropriate/optimal use of the health system.

Access Enablers will work with the PHN to establish coordinated referral processes to support consumer access to psychosocial, clinical and primary health care and implement standardised consumer intake processes across providers within Western Sydney.

Activity Consultation and Collaboration

Consultation

Consultation has occurred through the Mental Health Regional and Suicide Prevention plan 2020-2022 process, and the WSPHN Needs Assessment 2021-2024.

Current providers have been consulted for their feedback on the service delivery of this program

Local Health District: The Local Health District continue to have a positive relationship with the PHN and have been part of the engagement process from the beginning

Partnership Committees: These committees play a key role in helping to shape and design the services to be commissioned based on their experiences and needs.

Community and mental health care services: These services provide ongoing advisory and feedback.

Consumers: Organisations are required to obtain consumer input into the design of their proposed projects.

Collaboration

The current service providers underpin our shared intention to develop a cooperative and collaborative approach in providing Psychosocial Supports. They all currently provide services to clients across WSPHN region and all organisations are committed to developing a collaborative relationship that is mutually beneficial for all parties in delivering the Psychosocial Services in western Sydney.

Engaging with service providers, consumers and carers in the region: to identify unmet needs in relation to psychosocial capacity building.

Engaging with other commissioned services, NGO's providing other community support services and with NDIS Local Area Coordinators: to help shape the service to meet local needs and referral pathways and to help target the service to the group for whom it is intended.

Engagement with LHD adult and community mental health services with reference to referrals from that cohort.

Activity Priorities and Description

Program Key Priority Area *

Mental Health

Other Program Key Priority Area Description**Aim of Activity ***

The Department of Health (DoH) has funded Primary Health Networks (PHNs) through the Commonwealth Psychosocial Support Program (CPSP) to commission psychosocial support services for adults, 16 years and over, with complex mental health concerns and associated psychosocial functional impairment.

CPSP clients are not eligible if they have a current National Disability Insurance Scheme (NDIS) plan, however through the CPSP program will have access to supports to assist with an application for the NDIS.

Modelled on a stepped-care approach to support, consumers accessing CPSP will be assisted to receive the level and intensity of support they require to ensure all mental health and psychosocial needs are met.

The program aims to strengthen the capacity of consumers to live independently, safely and productively in their community, form meaningful connections in a supportive environment, and reduce the need for acute care.

CPSP service delivery includes the following streams which were formerly separate programs under NPS funding:

-Commissioning Psychosocial support for people with severe and persistent mental illness:

This NPS activity supports a range of non-clinical approaches to build functional capacity at an individual level to help enable personal recovery. The services are designed to help people for whom clinical care is insufficient to help them build capacity for daily living.

-NPS Transition Support Services:

Transition clients will be supported under “Transition Support” Services to assist with testing NDIS eligibility and to receive interim services.

-CoS Continuity of Support:

The aim of this activity is to support clients who have been previously declined for an NDIS plan, to re-test eligibility for the NDIS, while continuing to receive psychosocial supports

-NPS Interface:

The aim of this funding is for the WSPHN to allocate resources to plan, coordinate and support service providers to transition clients to Continuity of Support (CoS) measure and the National Psychosocial Support (NPS) program and provide support to Commonwealth Community mental health clients to transition to the NDIS

Description of Activity *

This program works in partnership with consumers (alongside their families and carers, as appropriate) to achieve recovery goals, and continue to receive adequate and appropriate support through capacity-building group activities which focus on social connection, mental health, physical health, and self-management.

WSPHN will continue to commission psychosocial support services to be delivered throughout the region. This CPS activity supports a range of non-clinical approaches to build functionality capacity at an individual level to help enable personal recovery. The services are designed to help people for whom clinical care is insufficient to help them build capacity for daily living. WSPHN will execute and manage contracts with existing partners and maintain arrangements for reporting and monitoring activities.

CPSP will be aligned to the demographics of the Western Sydney region - to ensure that our most vulnerable populations (including culturally and linguistically diverse, sexually and gender diverse, people who identify as Aboriginal and Torres Strait Islander) have equal access to the program to support their mental health and wellbeing.

WSPHN successfully delivered 3 procurement processes for the 22/23 FY and two of them being Head to Health and EPYS. Most clients who were supported through NPS now CPS have been transitioning to Head to Health and WSPHN will continue funding the current Pop-Up Clinic to ensure these clients continue their recovery. To ensure the best implementation and transition of the program with no service gaps the funding will fund a Transition Project Team and also co-fund the current Pop-Up Clinics while transition to the Head to Health Adult centre. As we have seen the programs increase in demand, funding will also support Commissioned providers to employ some other health professionals like Psychiatrists or Nutritionists

The Program is designed to support people with complex, often episodic, mental illness who:

- have needs that can be appropriately met through psychosocial support to live independently in the community, as determined through a capacity and strengths-based assessment tool
- are not restricted in their ability to fully, and actively, participate in the community
- are not receiving similar psychosocial supports through a state or territory government program or the NDIS, where there is potential for duplication of service offerings; and
- are aged 16 years and over, noting exceptions can be made for people aged less than 16 years subject to approval by the PHN.

Psychosocial supports services cover a range of non-clinical supports that focus on building personal capacity and stability in one or more of the following areas:

- social skills, friendships, and family connections
- day-to-day living skills
- financial management and budgeting
- finding and maintaining a home
- vocational skills and goals
- maintaining physical wellbeing, including exercise
- managing substance use issues

- building broader life skills, including confidence and resilience; and
- building capacity to live independently in the community.

-Commissioning Psychosocial support for people with severe and persistent mental illness:

WSPHN successfully delivered 3 procurement processes for the 22/23 FY and two of them being Head to Health and EPYS. Most clients who were supported through NPS now CPS have been transitioning to Head to Health and WSPHN will continue funding the current Pop-Up Clinic to ensure these clients continue their recovery. To ensure the best implementation and transition of the program with no service gaps the funding will fund a Transition Project Team and also co-fund the current Pop-Up Clinics while transitioning to the Head to Health Adult centre. As we have seen the programs increase in demand, funding will also support Commissioned providers to employ some other health professionals like Psychiatrists or Nutritionists.

The Western Sydney Primary Health Network (WSPHN) will continue to commission psychosocial support services to be delivered throughout the region. This NPS activity supports a range of non-clinical approaches to build functional capacity at an individual level to help enable personal recovery.

WSPHN will commission services to address the needs of the Serious Mental Illness (SMI) population including but not limited to:

1. Tackling social isolation in order to address overall wellbeing and recovery.
2. Recovery orientated services
3. Provision of psychosocial supports
4. Facilitation of consumer engagement with other support services including referral and letters of support.
5. Providing financial management and budgeting
6. Promotion of the importance of social skills, friendships and family connections
7. Providing vocational skills (including volunteering), education and training goals
8. Promotion of the importance of physical wellbeing and exercise
9. Management of drug and alcohol addictions, including tobacco
10. Secure housing and maintaining a home
11. Enhance the mental health knowledge, skills and capacity of GPs, including through the integration of psychiatric services into the primary care model to support general practice teams in their provision of more complex mental health care
12. Other services as deemed appropriate based on ongoing consultation and feedback from stakeholders.

Clients will continue to receive an appropriate level of assistance while they are supported to test eligibility for the NDIS or transition to ongoing supports.

SERVICE NAVIGATOR: funding has been provided to WSPHN from DoH under the Service Navigator Measure initiative to (1) recruit a service navigator to help consumers, families and carers access appropriate supports, and (2) support some clients of NPSM and CoS to test/retest NDIS eligibility.

- NPS Transition Support Services:

The purpose of this activity is to provide “transition support services” to ensure there are no gaps in service delivery and to give providers additional time for Commonwealth community mental health clients to transition to the National Disability Insurance Scheme (NDIS) or one of the following programs: Continuity of Support (CoS) or National Psychosocial Support (NPS).

Clients will continue to receive appropriate level of assistance while they are supported to test eligibility for the NDIS or transition to ongoing supports.

This will involve six main steps:

1. Build on ongoing relationships with former PIR, D2DL and PHaMs providers of whom already deliver commissioned services
2. Develop services to meet the needs of communities and individuals
3. Actively manage contracts with agencies, including provider meetings and frequent reporting.
4. Assist organisations transition eligible clients to NDIS through regular meetings to identify transition arrangements for existing clients, flag and address potential delays and barriers and identify strategies to transition clients with complex needs.
5. Support transition of clients unable to access NDIS to appropriate supports.

6. Identify appropriate ongoing support options for those consumers unable or unwilling to access NDIS.

- CoS Continuity of Support:

The CoS program ensures clients who have been assessed as ineligible for the NDIS, continue to receive adequate and appropriate supports through capacity-building individual and group activities which focus on social connection, mental health, physical health, daily living and self-management.

SERVICE NAVIGATOR: funding has been provided to WSPHN from DoH under the Service Navigator Measure initiative to (1) recruit a service navigator to help consumers, families and carers access appropriate supports, and (2) support some clients of NPSM and CoS to test/retest NDIS eligibility.

-NPS Interface:

Tailored to the needs of service providers, Western Sydney PHN uses Interface Funding to facilitate the below activities:

- Provide information and advice to all stakeholders on the psychosocial supports and available programs
- Support current service providers to assist participants to transition to new arrangements
- Support providers who are going to deliver National Psychosocial Support Funding to ensure performance is meeting objectives
- Collect and manage participant data
- Build workforce capacity
- Monitoring process and performance of programs

SERVICE NAVIGATOR: funding has been provided to WSPHN from DoH under the Service Navigator Measure initiative to (1) recruit a service navigator to help consumers, families and carers access appropriate supports, and (2) support some clients of NPSM and CoS to test/retest NDIS eligibility
